Don't Be Silent About Racial Profiling

Have you been a victim of racial profiling?

The General Assembly is considering a bill to make it harder for state and local police to engage in racial profiling. The opponents claim that racial profiling doesn't really happen. We need to make our voices heard and document EVERY case of racial profiling that happens against our family members, our neighbors, and ourselves.

Call 877-231-7171 to tell your story!

We want to know your story – past or present. Let the legislators know that racial profiling DOES happen in Rhode Island, and that it's time to make it stop.

Let us know if you want to get updates on what you can do to help!

Be the change you want to see.
